PROFILE

- Cloud and DevOps Engineer (CKA, AWS Solutions Architect, AWS SysOps)
- PhD candidate in AI applied to embedded systems and IoT
- Experience in production infrastructure (Ooredoo, freelance), DevSecOps automation, and AI solution development (RAG, computer vision, predictive models)
- Certified trainer with 1,000+ hours of Cloud, DevOps and AI training delivered to companies

CERTIFICATIONS

AWS Certified Solutions Architect – Associate · 2025

AZ-104 Azure Administrator Associate

LPI DevOps Tools Engineer · May 2024

AZ-900 · Feb 2024

AWS Certified SysOps Administrator – Associate · 2025

CKA – Certified Kubernetes Administrator · Feb 2024

AWS Cloud Practitioner · March 2024

EXPERIENCE

Cloud, DevOps & Artificial Intelligence Trainer
08/2025 - 01/2026
ANETI - Employment and Self-Employment Office
La Goulette, Tunisia

- **End-to-end AI programme (150h)**: trained learner pairs from zero to designing models trained on real datasets, defended before a jury. One pair's project (a predictive model for stock-market decision support) was picked up by BNA bank for further development.
- **Azure DevSecOps (120h)**
- **Azure DevOps (100h)**
- **AWS Cloud (100h)**: preparation for the Cloud Practitioner, Developer and Solutions Architect certifications

Consultant Infrastructure & DevOps
04/2025 - 10/2025
IPACT Consult inc
La Marsa, Tunisia

Technologies: **Linux · Ansible · Docker · Nginx · Git · Jenkins · Grafana · Prometheus · Azure**

- Rebuilt the entire server infrastructure and system configuration of two startups that had no structured DevOps process.
- Standardized deployment workflows, replacing fragmented individual practices with a single unified pipeline.
- Designed the end-to-end server architecture to support the growth of the engineering teams.

DevOps Engineer
07/2024 - 02/2025
PASS Consulting Group
Remote

Technologies: **JEE · Jenkins · Docker · Grafana · SonarQube · JUnit · Git · K8s · Ansible**

- Hired as a JEE developer, promoted to a DevOps role after building CI/CD pipelines (Jenkins, Docker, SonarQube, JUnit, Git) approved by the German client team.
- Designed and deployed automated deployment pipelines, ensuring consistent software updates across all environments.
- Documented the development phases to ease future maintenance.
- Automated repetitive tasks, increasing team productivity.

Cloud and DevOps Trainer
10/2023 - 07/2024
Clevory Training
El Charguia, Tunis

Cloud & DevOps Intern
02/2023 - 09/2023
Ooredoo Tunisia
Lac 2, Tunis

Technologies: **ViPR SRM · VROPS · HAProxy · NFS · Virtualization · Jenkins · Ansible · Docker · Terraform · Kubernetes · Grafana · Prometheus · Selenium · JMeter · SpringBoot · Neo4j**

- Designed and deployed operational monitoring dashboards for daily platform supervision.
- Created architecture plans ensuring high availability, failover and backup of critical systems.
- Built a contingency-plan automation tool to contain incidents when no engineer is on site.

FINAL-YEAR PROJECT SUPERVISION

- Intelligent security incident response automation tool for Institut Pasteur de Tunis: threat detection, autonomous execution of predefined response playbooks, corrective-action recommendations and detailed remediation guides.
- Computer-vision plant disease detection from leaf photographs - currently being turned into a startup with support from the Ministry of Agriculture.
- Inventory management application with an automation module that contacts suppliers directly when stock runs out, for a veterinary practice - deployed.

PROJECTS

Life OS — Personal operating system

Technologies: **PWA · LLM · Speech input · Netlify Functions · Cloud sync**

- A personal operating system: one typed or spoken sentence is turned by an AI into validated actions, with one-tap undo.
- 5 modular apps sharing one sync key: Wallet (finance), Wardrobe, Gym (training), Learn (micro-learning) and Notes.
- Wallet reads income and spending (photograph receipts), analyses and advises, and plots the shortest path from your own behaviour to a financial goal, to fix money habits.
- LifeWallet: a conversational spending and budget tracker, with financial entity extraction and automatic transaction classification.

Create Life — Artificial life, raised not programmed

Technologies: **Python · Ollama · Embeddings/RAG · Self-rewriting code · pytest**

- An experimental artificial life running locally: a small mind (Ollama, CPU) born knowing nothing, that talks and remembers across sleep — a journal, core memories, identity 'islands'.
- Its own curiosity and will: it picks its own topics, reads the web on its own, forms and raises its own opinions, and can disagree or decline; recall by meaning, backed by sources, grounds its replies.
- Self-evolution: in its waking windows it rewrites a bounded part of its own code and judges the result itself; a guardian beyond its reach restores any change that breaks it. An immutable core of principles, an owner-only kill switch, legacy through a plain-file export. Not sentient, and no pretence of it.

Thesis ecosystem — Tools for the whole PhD journey

Technologies: **Next.js · PostgreSQL · Prisma · Kubernetes · Helm · NextAuth · FastAPI**

- 4 connected tools for students and supervisors: find a subject and a supervisor, publish the thesis, question your own sources and run the research; microservices deployed on Kubernetes with Helm, 3 open-source repositories.
- ThesisVault (a library with a page per researcher) and ThesisMatcher (subject proposals, applications tracked from pending to accepted, NextAuth).
- ThesisLens: a RAG desktop app that queries your own files in natural language, with answers cited to the page and passage — RAGAS Faithfulness ≥ 0.82 on a 50-question test set, latency < 6 s (95th percentile), zero-cost architecture.

EDUCATION

PhD (Machine Learning) — **11/2024 - Present**
SUP'Com | Ecole Centrale Lyon — El Ghazela, Ariana | Ecully, Rhône

Engineering Degree, Cloud Computing and DevOps — **09/2018 - 11/2023**
ESPRIT — El Ghazela, Ariana

Medicine — **09/2016 - 07/2019**
FMT - Faculty of Medicine of Tunis — Beb Saadoun, Tunis

LANGUAGES

Arabic · Native **English** · Advanced - IELTS 7.5 **French** · Advanced - DALF C1
